

MD TB

Bench dispensers for single sided PVC and polypropylene adhesive tapes up to 25 mm (1") in width. These dispensers permit the contemporary use of tapes of different colours, qualities, or prints.

- ✓ Strong body structure is made of sheet steel (thickness 4 mm). It is coated by epoxy-polyester powder paint. The weight of the body and the soft rubber carpet under the dispenser give the necessary stability for efficient use.
- ✓ These dispensers do not keep sand or similar materials. This is important if the dispensers are used in production departments or offices, where the release of sand or powders could damage machinery.
- ✓ The core holders are each other independent, for an easier replacement of the exhausted tapes.
- ✓ We produce two models : for 2 or 4 rolls.
- ✓ The blade is made of hard steel. The special process of production gives sharp and strong teeth for an efficient cut of the adhesive tape. The blade is easily replaceable.

Toothed blade

Technical characteristics

Code	Description	Max tape width mm	Max Ø tape mm	Ø core-holder "	Net weight Kg	Pcs per carton
1 212 025	MD/2 TB	2 x 25	155	3	2,420	12
1 214 025	MD/4 TB	4 x 25	155	3	4,070	6
