

# T30R AB LF

Hand dispensers for single sided PVC and polypropylene adhesive tapes. It is designed for rolls of tape of bigger dimension. They are useful tools in every shipping department or office to seal cartons and parcels.

- ✓ Its one-piece frame is made of sheet steel (thickness 2 mm) and is strengthened by deep ribs. This grants a strong structure to allow efficient performances over a long period of time. It is coated by epoxy-polyester powder paint. The body is longer than the standard one so it can accept tapes of bigger external diameters (up to 175 mm).
- ✓ The applying roller, covered by soft rubber, allows a perfect adhesion of the tape.
- ✓ The anatomic handle and rolls are made of ABS resin.
- ✓ The core holder is provided with a brake which is easily adjustable by a knurled knob. The brake is necessary for the use of tapes that unroll easily.
- ✓ The plastic pressure plate is made of polyamide resin (PA) glass fibre reinforced.
- ✓ The blade is made of steel and hardened. The special process of production gives sharp and strong teeth for an efficient cut of the tape. The hardening treatment improves the endurance of the blade.
