

# DSB TB MS

It is a bench dispenser for easy use of double-sided tapes or single-sided adhesive tapes with a protective liner. It is used to make paper or cardboard self-adhesive, stick parts on sample books and assemble parts. The dispenser removes the liner and rewinds it on a spool, making the peeled off tape ready to use. It is a useful tool that permits saving a lot of time when using double-sided tapes.

- ✓ Strong body structure, made of sheet steel (thickness 4 mm). It is coated by epoxy-polyester powder paint
- ✓ The toothed blade is made of hard steel. The special process of production gives sharp and strong teeth (step 1,5 mm) for an efficient cut of the tape.
- ✓ The core holder and the spool for the liner are provided with adjustable brakes.
- ✓ It takes tape up to 50 mm (2") in width, 160 mm of external diameter on 76 mm (3") cores. It is suitable for double sided tapes with embossed PVC or silicon paper liner.
- ✓ This particular execution is characterized by an additional sliding arm. This permits cutting pieces of tape at a pre-set length. The maximum length is 500 mm.
