

# DSH TR

Hand dispenser for easy usage of transfer tapes. It is used to stick photos, make paper or cardboard self-adhesive, stick parts on sample books and fix the end of the rolls of paper or cloth, to assemble parts. The dispenser removes the liner, rewinds it on a spool and sticks the transfer tape. It is an useful tool that permits saving a lot of time when using transfer tapes.

- ✓ Strong body structure, made of sheet steel, strengthened by deep ribs. It is coated by epoxy-polyester powder paint.
- ✓ The spool for the liner is provided with adjustable brake.
- ✓ The movement between the core holder and the spool is transmitted by two gears made of nylon. This is a strong and efficient system.
- ✓ The applying roller is covered by soft anti-adhesive rubber.
- ✓ The anatomic handle is made of ABS resin.
- ✓ The trigger and the specially designed core holder permit a sure stop and tear of the tape.
- ✓ It takes tapes up to 140 mm of external diameter on 3" or 1" plastic cores. It is very easy . The 1" core holder is enclosed in the package and can replace the 3" standard one.

*DSH/25 TR + short 12mm extension arm*

### Extension arm for DSH / 25 TR

If requested, the dispenser can be supplied with a special extension bracket (as shown in the picture) which allows the applying roller to be moved further forward when the tape needs to be applied in areas not easily reached by the standard dispenser.

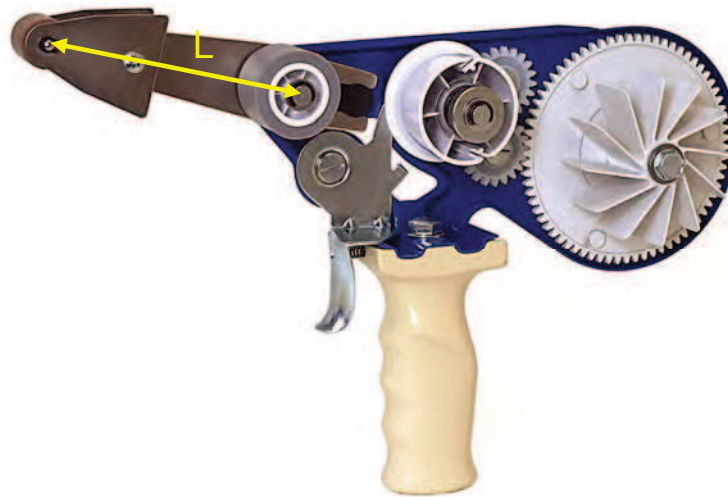

The extension arm is easily attached and removed without any tools.

The sizes available are : 6 - 9 -12 - 15 - 19 - 25 mm.

The extension brackets are produced in 2 versions: long (L= 105mm) and short brackets (L=65mm).

Long and short arms for DSH/25 TR

DSH/25 TR provided with long arm
