

MD RB

Bench dispensers for single sided PVC and polypropylene adhesive tapes up to 25 mm (1") in width. These dispensers permit the contemporary use of tapes of different colours, qualities or prints.

- ✓ The strong body structure is made of sheet steel (thickness 4 mm). It is coated by epoxy-polyester powder paint. The weight of the body and the soft rubber carpet under the dispenser give the necessary stability for efficient use.
- ✓ These dispensers do not keep sand or similar materials. This is important if the dispensers are used in production departments or offices, where the release of sand or powders could damage machinery.
- ✓ The core holders are independent of each other for an easier replacement of the exhausted tapes.
- ✓ We produce two models: for 2 and 4 rolls.
- ✓ Dispensers provided with razor blades. They are mainly used in graphic fields where a net cut of the tape is required (Litho-tapes).

Razor blade

Technical characteristics

Code	Description	Max tape width mm	Max Ø tape mm	Ø core-holder "	Net weight Kg	Pcs per carton
1 222 025	MD/2 RB	2 x 25	155	3	2,470	12
1 224 025	MD/4 RB	4 x 25	155	3	4,085	6

All these articles are available for left handed peoples too. To identify this execution, please add the **SX** code to the standard one. (ex MD/2 RB SX)
