

DSH

Hand dispensers for easy use of double-sided tapes. They are used to make paper or cardboard self-adhesive, assemble parts and fix the end of the rolls of paper or cloth. The dispenser removes the liner and rewinds it on a spool, giving the peeled off tape ready to stick. It is a useful tool that permits saving a lot of time.

- ✓ Strong body structure, made of sheet steel, strengthened by deep ribs. It is coated by epoxy-polyester powder paint.
- ✓ The toothed blade is made of hard steel. The special process of production gives sharp and strong teeth for an efficient cut of the adhesive tape.
- ✓ The core holder and the spool for the liner is provided with adjustable brakes.
- ✓ The movement between the core holder and the spool is transmitted by two gears made of nylon. This is a strong and efficient system.
- ✓ The applying roller is covered by soft anti-adhesive rubber.
- ✓ The anatomic handle is made of ABS resin.

1" core holder for DSH/25

- ✓ They take tapes up to 140 mm of external diameter on 76 mm (3") cores.
- ✓ The DSH/25 is provided with an extra core holder 1" in diameter , that could replace the 3" standard one.
- ✓ A roll guide is available for these dispensers. This device permits sticking the tape perfectly straight. The picture below shows this device.

DSH/25 provided with roll guide

DSH/50

Technical characteristics

Code	Description	Tape width mm	Max tape Ø mm	Core holder Ø "	Net weight Kg	Pcs per carton
