

# SAT 20

It is manufactured in 2 versions :

**SAT 20 HA**, suitable for high/medium adhesion tapes

**SAT 20 LA**, suitable for low adhesion tapes

**SAT 20 HA** permits an easy use of VHB™ or similar adhesive tapes. They are used for a fast and easy assembly of parts. These kind of tapes can replace the use of weld, screws, rivets and liquid adhesives giving many advantages. The dispenser improves productivity.

The main fields where these tapes and dispenser are used are : building construction, automotive, electronics, white household equipment, furniture (wood and metal) and signs.

**SAT 20 LA** is suitable for double sided or transfer tapes when applied without removing the liner. Many products or parts are supplied with pieces of double sided and liner stuck on it. The operator in production or the final users remove the liner when use these. An important field of use is paper and cardboard industry.

- ✓ Strong body structure, made of sheet steel, strengthened by deep ribs. It is coated by epoxy-polyester powder paint.

- ✓ The anatomic handle is made of ABS resin.
- ✓ The dispenser is provided with a special designed cutting system that permits to cut these tapes.
- ✓ It takes tapes up to 320 mm of external diameter on 3" cores. The maximum tape width is 20 mm and maximum thickness is 1,5 mm.
- ✓ A roll guide (included in package) is available for this dispenser. This device permits sticking the tape perfectly straight. The picture below shows this device.

### *Technical characteristics*

Code	Description	Tape width mm	Max tape Ø mm	Core holder Ø "	Net weight Kg	Pcs per carton
